

3 Year old class-T/Th-Positive Behavior Plan

Our class will provide instant rewards for positive behavior. For example: a stamp, a sticker, and of course, praise. This will show the child that his/her actions were heard and/or seen and their actions as well as themselves were appreciated. If a child is having a hard time making good choices will initially be redirected. If need be, we will utilize a thinking chair in order for the child to get themselves together. We will help in any way needed, for example ways to calm down, to make a better choice and to rejoin the group or activity when they are ready. The sitting chair will never exceed more than 3 minutes and a teacher will always be in arms reach reassuring the child and offering a hand to hold, kind words and/or a hug if needed.

We understand every child is different. While this is our policy we will adjust it at any time to accommodate different children's needs. Our goal is to have a positive, fun, nurturing environment where children can express themselves in their own unique way. We are building your child's educational foundation and want that to be a positive one where the love of learning is planted.

If you have any questions/concerns please do not hesitate to contact me-
